Making waves in the retirement industry

Founded in 2015, Human Interest is a hyper-growth company on a mission to ensure that people in all lines of work have access to retirement benefits.

40,000+
businesses trust Human Interest to be their plan provider.

1,000,000+
employees covered⁴

500+
payroll integration easy.

Core Features

- YTD Panel
- Projection Panel
- Save button that goes to local store
- Enforced Limits
- Mode toggle (Percentage of Paycheck/ Fixed Annual Dollar)

Tech Stack

- > Frontend: Vanilla HTML, CSS, JS
- > Backend: [Node.js](#) (with no dependencies)
- > Datastore: Local json file

Architecture

Browser (SPA) <-HTTP-> Node server (http, fs) <-local disk-> settings.json
 \— static /public (HTML/CSS/JS)

-Frontend calls following APIs

- GET /POST /api/settings (save/load contribution mode and amount)
- GET /api/ytd show mocked profile (for year-to-date summary)
- GET /api/projection to compute per period contributions and totals
- Server takes cares of the rules: IRS cap (23k annual max*), employer match per period, combined cap, etc

Future

- ROTH IRA vs Traditional 401k Mode
 - ROTH accounts are common options
 - Allow for different tax timing/schemes (which affect take home pay and post tax income)
 - Let people choose the right mix of accounts for their situation and needs
 -
- Bonus & Irregular Pay Panel
 - Common for people to get various bonuses (annual, quarterly), which changes the limit caps
- Import/ Export
 - Allow people to import pay histories & other financial data
 - Allow users to export their results and projected totals to share
